Complete sign up form

Be sure to use the same email address each time you login

Look out for email to your Inbox to complete your Xpedition2 registration and click Confirm

Email is from noreply@xpedition2.com – it may be sent to your Junk box

Login using your email address and new password

You are ready to plan a route!

Plan a Route

|		
Sign in to your Xpedition2 account		Be sure to use the same email address and password you used to sign up
Show sidebar, by clicking button on Map Tool Bar if not visible		The function of each button shows when you hover on it. See below for key
Add a new route by clicking + for Routes Tool Bar		
Choose an option from Map Selector list (varies by subscription level)		Using the most appropriate route at the planning stage improves accuracy but a route may be viewed on a different map later on
On Routes Tool Bar, select snap-to-road, bike or track or leave in straight line (point to point) format		These options can be switched on and off along a given route (snap-to-bike or snap-to-track for Standard or Premium subscription)
Click to select start point		This and other points can be dragged to a different position

Plan a Route (continued)

|		
Click to select route points		The latest route point will appear as the route end as you add more points
Remove last point		If you are unable to drag a point to where you need, remove and replace
Select end point		For a circular route, place end point adjacent and not on the start flag
Save and name route		Click Save in Routes Tool Bar

Name route in window and click Save |

Use a Route

Sign into Xpedition2

Sign in with either link

Click Open a Route in Map Tool Bar

In Open window, click file icon to right of chosen route

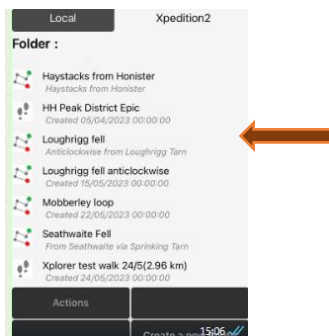

Export route as gpx file

This can be imported into third party activity tracker, or shared with friends

OR
Click Garmin logo to synch with your Garmin Connect account

OR
Open Xplorer GPS mobile app and find route in Xpedition2 folder
